Professional Summary

Senior Full Stack Developer with 20+ years building performant, accessible web applications using Vue.js, Nuxt.js, and modern JavaScript. Specializes in translating complex requirements into elegant, user-centered interfaces that scale.

Frontend performance advocate who has reduced initial load times by up to 45% through code splitting, lazy loading, and optimized asset delivery. Implementations consistently achieve 90+ Lighthouse performance scores.

Built and led frontend initiatives that increased test coverage from 45% to over 80%, implementing automated testing pipelines that catch regressions before production. Created 20+ reusable component libraries adopted across multiple teams.

Skills

Category	Skills
Frontend	Vue.js, Nuxt.js, React, Svelte, JavaScript, TypeScript, HTML5, CSS3, TailwindCSS
Backend	Node.js, Express, REST API, API Gateway, GraphQL
Testing	Jest, Vue Test Utils, Vitest, Testing Libray, Cypress, Playwright, Storybook
Cloud & DevOps	AWS (Lambda, API Gateway, CloudWatch, S3, ECS), Docker, Terraform, Cloudflare, Netlify, CI/CD
Databases	MongoDB, DynamoDB, PostgreSQL, MySQL, SQL Server, Supabase, Firebase, Redis
Tools	Git, GitHub, Webpack, Vite, NPN, Bun, Agile/Scrum Methodologies
Expertise	Performance Optimization, SEO, Web Accessibility, Mobile-First Design, Technical Leadership, Micro-frontends, A/B Testing, AI-Assisted Development

Work Experience

Senior Full Stack Developer

LoveToKnow Media Spain — November 2019 – January 2026

- Led frontend architecture for YourDictionary.com (45M+ monthly visitors) using Vue.js and Nuxt.js + AWS serverless stack with AWS Lambdas, API Gateway, and DynamoDB. Helped monitor performance and system health with AWS CloudWatch and Grafana dashboards.
- Improved Lighthouse performance scores from 55 to 92+, reducing Largest Contentful Paint by 60% through code splitting, lazy loading, and image optimization

- Built a shared component library of 40+ reusable Vue components adopted by 3 product teams
- Increased automated unit testing coverage from 30% to 78%, catching 95% of regressions before deployment
- Collaborated with the team to build a Cypress E2E test suite covering 40+ critical user journeys, reducing manual QA regression time by 70%
- Drove Nuxt 2 to Nuxt 3 migration across 5 micro-frontends with zero downtime
- Championed the adoption of CodeRabbitAI for automated PR reviews, reducing code review turnaround time by 40% and catching issues earlier in the development cycle

Senior Frontend Developer

Allianz Technology — April 2026 – July 2026

- Developed Svelte-based frontend modules for Meine Allianz, serving 2M+ insurance customers across Germany
- Reduced feature delivery cycle by 30% through improved component architecture and code review processes in a cross-functional international team
- Leveraged Claude AI as a coding accelerator to implement features and auto-generate Vitest unit tests, achieving 85%+ coverage on critical user flows while shipping changes 2x faster

Frontend Developer

EDREAMS Odigeo — April 2018 – October 2019

- Owned frontend quality for a high-traffic travel booking platform processing 10M+ searches daily
- Built automated testing pipeline (Karma unit tests + Gherkin E2E) running on Jenkins, reducing production bugs by 40%
- Maintained 85%+ test coverage across Backbone and React codebases
- Led A/B testing framework implementation, shipping 20+ experiments that improved conversion by 12%
- Introduced visual regression testing with BrowserStack, catching 30+ visual defects before each release
- Reviewed code across 6 frontend teams ensuring consistent best practices

Senior Frontend Developer & Test Automation Engineer

CAPITOLE CONSULTING — July 2016 – April 2018

- Developed interactive booking interfaces for a major travel agency platform (Backbone, jQuery, Lodash), serving 500K+ monthly users. Refactored legacy code into modular components, reducing page load time by 35% (10/2017 – 04/2018)
- Designed and deployed automated test suite (TestComplete + Jenkins CI) for a pharmaceutical compliance system. Cut regression testing from 3 days to 4 hours, achieving 92% automation coverage across 200+ test cases (01/2017 – 10/2017)
- Architected migration of a legacy banking application to a responsive AngularJS SPA, serving 100K+ corporate banking users. Delivered project on schedule, reducing page load times by 50% and enabling mobile access for field agents (07/2016 – 12/2016)

Web Developer

FIATC Seguros — June 2003 – July 2016

- Designed and built the online insurance sales platform handling 15K+ policies per year across travel assistance and motor insurance

- Streamlined the quote-to-purchase flow, reducing drop-off by 25% and cutting average transaction time from 8 to 3 minutes

Web Developer

Institut Català de Tecnologia — June 2001 – May 2003

- Maintained the organization's public web portal and 3 internal web applications, ensuring 99.5% uptime
- Built XML/XSLT publishing pipeline reducing content publication time from 2 days to 4 hours

Web Developer

Secretariaplus.com — April 2000 – May 2001

- Developed and maintained ASP-based web application with SQL Server backend managing 10K+ client records
- Built data entry interfaces that reduced processing time by 40% for administrative staff

Education

Degree	Institution	Period
Google Data Analyst Certificate	Coursera	Nov 2022 – Jun 2023
E-business Technologies (Master's)	Institut Català de Tecnologia	Oct 2001 – May 2002
Industrial Technical Engineering (Electronic specialty)	Universitat Politècnica de Catalunya	Sep 1995 – Jun 1999

Certifications

- Full Stack Open Containers — MOOC.fi
- Continuous Integration — MOOC.fi
- React Native — University of Helsinki
- GraphQL — University of Helsinki
- TypeScript — University of Helsinki
- Mastering TypeScript 2024 — Udemy
- Google Data Analytics — Google/Credly
- Test Driven Development (JavaScript & Jest) — Udemy
- Intermediate Python — DataCamp
- Introduction to Python — DataCamp
- Python Data Science Toolbox — DataCamp
- The Software Architect Code — edX
- Bootstrap — edX
- Linux Foundation LFS101x (Intro to Linux) — edX
- HTML5 Part 1: Coding Essentials & Best Practices — edX
- HTML5 Part 2: Advanced Techniques & Best Practices — edX
- Programación Javascript — MiriadaX
- Cloud Services (HTML5, JavaScript, Node.js) — MiriadaX
- HTML5 CSS Javascript — MiriadaX

- Agilidad y Lean — MiriadaX
- Deutsch Lernen Nicos Weg A1 — DW

Projects

Project	Stack	Highlights
Gym Tracker	Nuxt 4, Vue 3, TailwindCSS, Firebase	Performance: 98, Accessibility: 100
GOAT Notes (AI)	Next.js, Supabase, Prisma	AI-powered note-taking, Performance: 92, Accessibility: 95
Tercer Espai	Nuxt.js, Tailwind, Supabase	CMS-driven events platform, Performance: 95, Accessibility: 97
Foto Uploader	Vanilla JS, CSS, Netlify Functions	Serverless image upload, Performance: 99, Accessibility: 100
QR Code Generator	Astro, Cloudflare Workers	Serverless QR generation, Performance: 99, Accessibility: 100
Space Tourism	HTML, CSS, JavaScript	Responsive static site
Creu Alta Basket	Drupal, Vue.js	CMS + Vue registration app
Kiloday Calculator	Vue, Vite, Pinia	Alternative birthday calculator
My 1 RM	Nuxt, Netlify	1-rep max calculator
System Monitor	Node.js, Express, Vanilla JS	System resource monitoring

Languages

- **Spanish** — Native
 - **Catalan** — Native
 - **English** — Professional proficiency
 - **German** — Basic (A1)
-

Interests

- Building side projects to explore new technologies (Vue, Nuxt, Astro, AI integration)
- Strength training and fitness
- Reading (literature and technical)
- Camping and outdoor activities
